

# Comenius Project

## Charter Schools in Comenius Project

The Application for a Comenius Programme was officially approved for the Primary School of Nadur (Gozo, Malta), member of the Charter. They have been granted funds from the EU to coordinate this partnership (September 2008 –August 2010) with other schools in England, Lithuania, Italy, Sweden and Turkey.

The partner schools in England, Sweden and Lithuania also come from the charter members of Desborough, Ockelbo and Zagare respectively.

This is the first time for the town of Nadur to be working so close with the charter members on an education level for two years. This will enhance and strengthen the collaboration that already exists.

The Life Long Learning programme entitled '**Networking Minds**' involves extra-curricular activities for teachers, pupils and parents, and the community as a whole. Together they will share their methodology and ideas mainly through IT and work on a European dimension.

Besides regular meetings, video conferences and final end project products, these charter schools will organise several teachers' and pupils' exchange visits as well. The Project coordinators are Mrs. Ines Buttigieg and Mrs Jeanette Farrugia from the Nadur Primary.
