

## Working abroad

In 2005 it was the first time we were offered to send a group of students to Holmegaard. Thanks to Inger Damgaard who made it possible for many of them to widen their work experience by doing a period of practical training in different Danish companies. Since then it has become an interesting alternative to working in the home community. Although some of them have already taken part in different exchange programmes, this two weeks training, which forms part of the secondary education in Germany, is a completely new experience since they have to act on their own, fully responsible for what they do.

Praktikantentreffe in Holmegaard/Naestved

In 2006 Ockelbo joined this project which has become a kind of exchange programme since Swedish students, too, have already worked in Hepstedt and its neighboring places.

As all those who have been involved in this new kind of cooperation are convinced that a traineeship abroad is quite a valuable experience, I'd really like to widen this project by inviting as many communities as possible to join our project.
